January 18, 2012

Dear Teachers and School Officials,

It is once again time for the annual Louisiana Tech Engineering and Science Day, sponsored by the Louisiana Tech Engineering and Science Association (ESA). This year's event will take place on Wednesday, April 25, 2012 on the Louisiana Tech campus. Engineering and Science Day is a wonderful opportunity to expose your students to the various disciplines of engineering and science. We have an exciting line-up of activities and a guest speaker planned for the enjoyment and education of your students and yourself.

In an effort to improve the organization and efficiency of the event, we are asking that all schools pre-register prior to the event, although we do not expect you to pre-pay. The cost per student is \$5. This fee covers the cost of the day's activities and a t-shirt. Upon arrival, we will accept your registration fee, and we will give the sponsor of each group a packet for each student registered. Please note that for this year's event, we are not providing lunch to the students. However, Tech's campus is filled with a variety of eating locations that the students are welcome to enjoy at their own expense. Space is also available if your school chooses to bring sack lunches or something comparable.

There will be two options for the registration process. You may fill out the attached registration form and fax it in to us (Attn: ESA – (318) 257-2562), or you can register on our website at <http://esa.latech.edu/register.html>. On our website, there is also a printable version of the registration form in case something happens to your original copy. The deadline for registration is Wednesday, March 28, 2012. Please make every effort to have your school registered by this date so that we can be sure to have enough supplies for all students. Any late registrations will be subject to a \$5.00 per person late fee. Once your registration has been received, we will mail a packet to you containing driving directions, a campus map, and other information you may need.

On behalf of the administration and faculty of the College of Engineering and Science and the executive board and members of ESA, I invite you to accept this wonderful learning opportunity for your students. Engineering and Science is a fascinating field that has great potential for the future. If you have any questions or concerns, please feel free to contact us by email at esa@latech.edu. I hope to see you and your students at this year's Louisiana Tech Engineering and Science Day!

Sincerely,

Chase DeShazer
